Professional Summary

- SAP UI5 Developer with 2.6 years of experience in developing and deploying SAP Fiori applications.
- Proficient in SAP UI5, JavaScript, HTML5, and CSS3 for creating responsive and user-friendly applications.
- Experienced in OData service integration and consumption in SAP UI5 applications.
- Skilled in working with SAP Web IDE and SAP Business Application Studio (BAS) for application development.
- Well-versed in Fiori Elements, Smart Controls, and MVC Architecture.
- Capable of effective collaboration with functional consultants and business users to gather and implement UI requirements.
- Good knowledge of Git and version control systems for code management.
- Experienced in debugging, troubleshooting, and performance optimization of SAP UI5 applications.
- Continuously learning and updating knowledge of new SAP technologies and best practices.

Work Experience

SAP UI5 Developer   2022 – present
Atos Syntel   Chennai, India

- Developed multiple SAP UI5/Fiori applications integrating with *OData services*.
- Designed and implemented *responsive, user-friendly interfaces* using SAP UI5 and custom controls.
- Worked collaboratively with *functional consultants and end-users* to gather business requirements.
- Ensured application *performance optimization, debugging.*

Skills

- SAP UI5 & Fiori Application Development
- OData Service Integration
- SAP Web IDE / BAS
- JavaScript, HTML5, CSS3
- Fiori Elements & Smart Controls
- MVC Architecture
- Git & Version Control
- Debugging and Performance Optimization
- SQL

Education

B.Tech   2018 – 2022
GMR Institute Of Technology   Razam, India
Branch: Computer Science And Engineering
CGPA: 7.4

Projects

NESSIE
Employee Leave Quotas:
- Developed a Leave Quotas page to provide a comprehensive overview of employee leave entitlements within the organization.
- Displayed the total number of leave days available, leave days utilized, and the remaining leave balance for each employee.
- Designed a clear and intuitive UI using SAP UI5 framework, ensuring easy navigation and a user-friendly experience.
- Integrated the application with OData services to fetch real-time leave quota data from the SAP backend system.
- Implemented dynamic data binding and two-way interaction to update leave information instantly based on user actions.
- Enabled employees to track their leave status and plan their time off effectively, improving transparency and HR process efficiency.
- Applied MVC architecture to structure the application for maintainability and scalability.
- Conducted thorough testing, debugging, and performance optimization to ensure smooth operation across devices and browsers.

Employee Mandatory Courses:
- Developed an application to display mandatory training courses assigned to employees, categorized by their scope.
- Designed the interface with two distinct tables — Local and Global courses, based on the 'Scope' field from the data source.
- Utilized OData services for seamless data retrieval, management, and real-time integration with the SAP backend.
- Implemented dynamic table rendering and filtering to separate course data into Local and Global categories efficiently.
- Designed a user-friendly and intuitive SAP UI5 interface, ensuring clarity and ease of access for users.
- Applied MVC architecture for clean, maintainable, and scalable application structure.
- Ensured real-time updates and synchronization of course data, improving visibility and compliance tracking for mandatory trainings.

Personality Traits

- Leadership
- Problem Solving Skills
- Communicative
- Collaborative
- Organized
- Time Management
